Historical split candidate: geometry is admissible, near-wall B2 is not

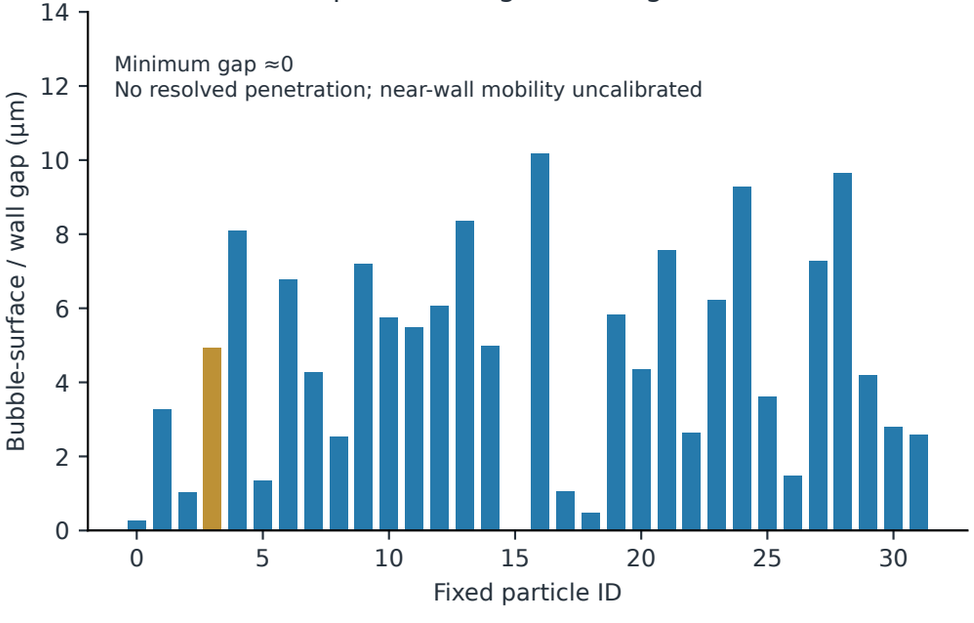

a Original open Y-vessel wall

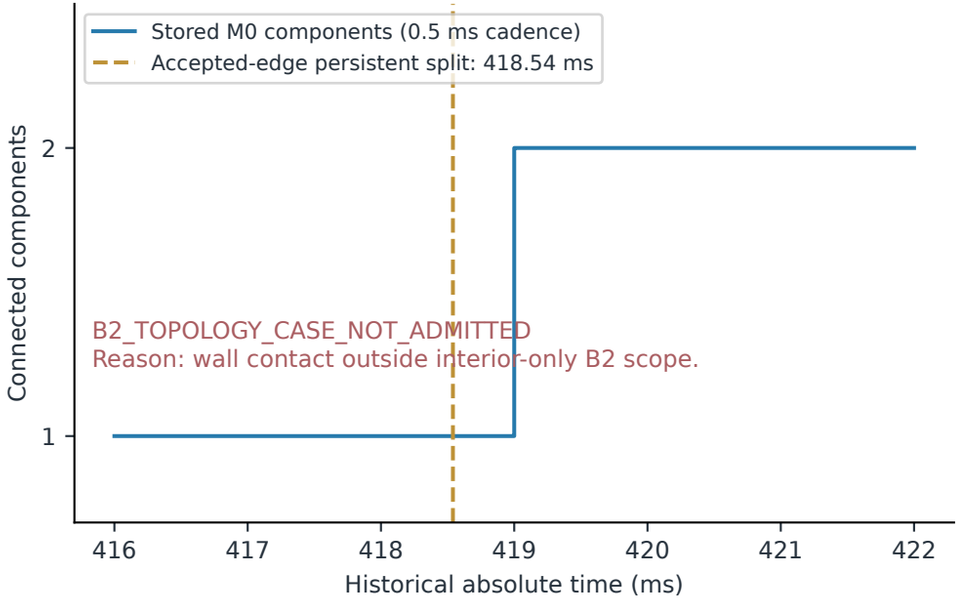

b Actual 32 bubbles, true radius 1.78 μm

c Independent original-triangle distance

d M0 history is not B2 ground truth

Original mesh and actual sphere positions; no translated cloud. Gold: ID3, later separated in M0.
Geometric non-penetration does not validate wall hydrodynamics. EXPLORATORY / PHYSICS_UNCALIBRATED.
