# F4-2 | Actual near-wall aggregation
## Original WALL geometry • actual sphere radius • fixed cameras within each ROI

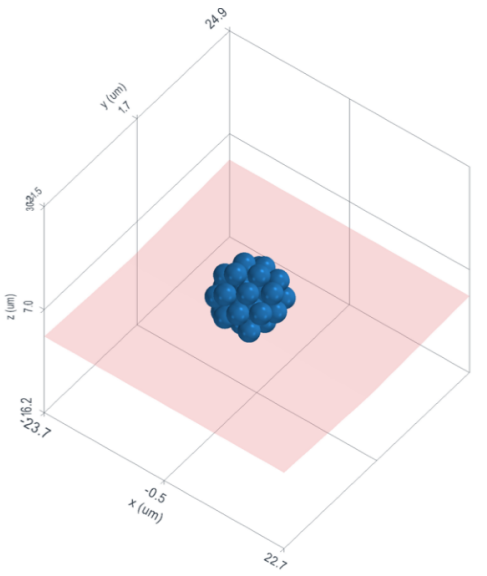

Parent | t = 0.0 ms; Nmax = 1

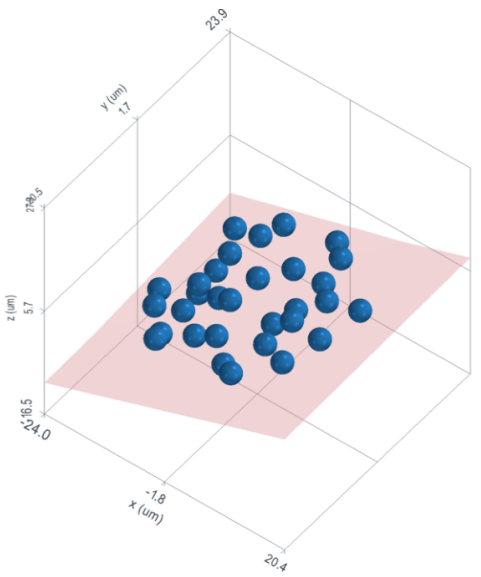

Parent | t = 42.0 ms; Nmax = 19

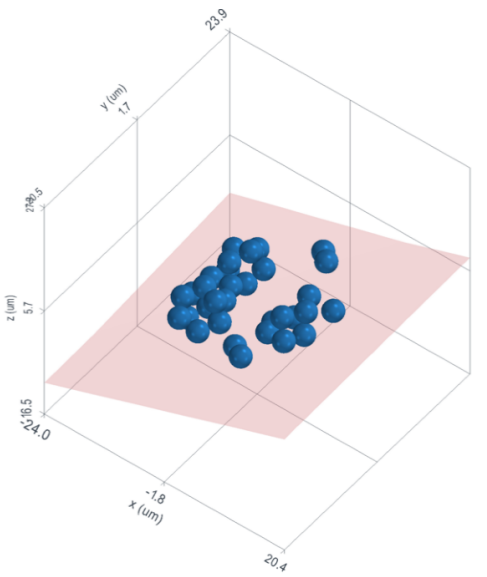

Parent | t = 600.0 ms; Nmax = 32

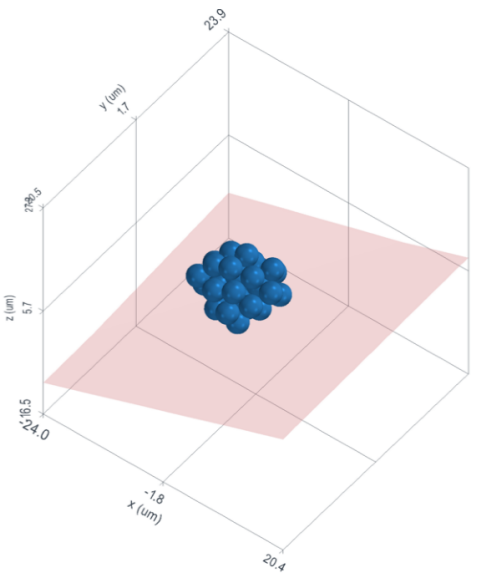

Junction | t = 0.0 ms; Nmax = 1

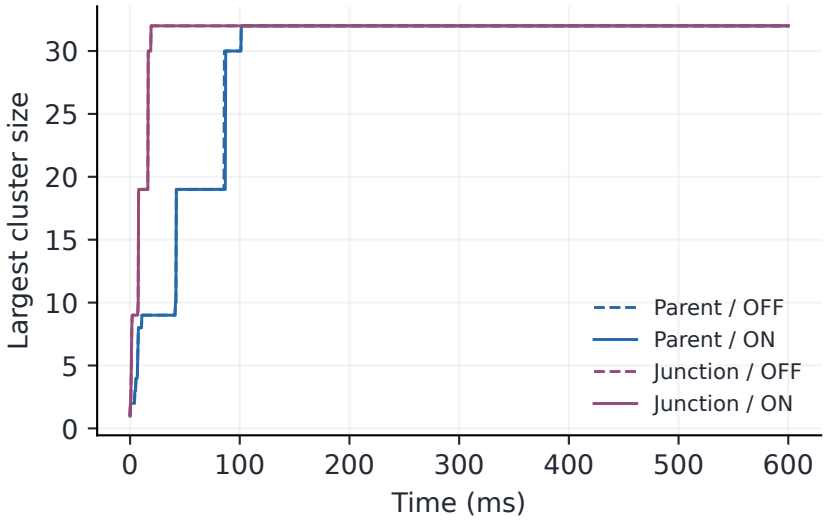

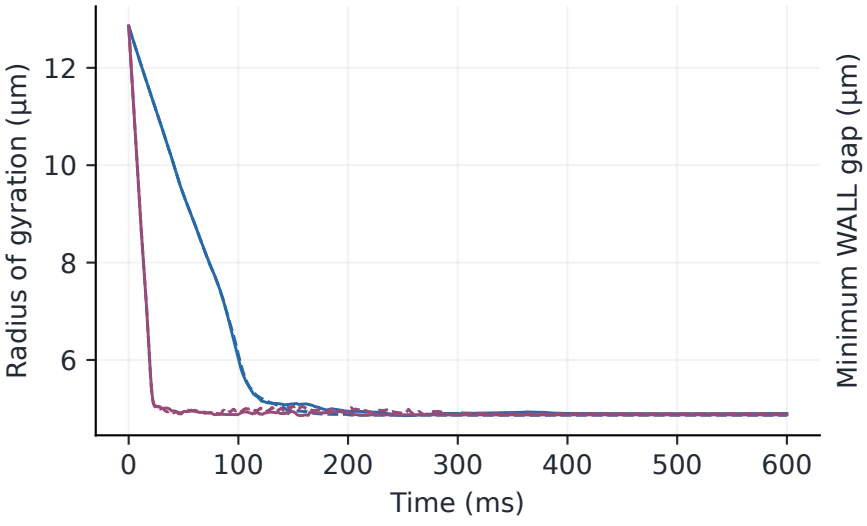

Junction | t = 7.6 ms; Nmax = 19

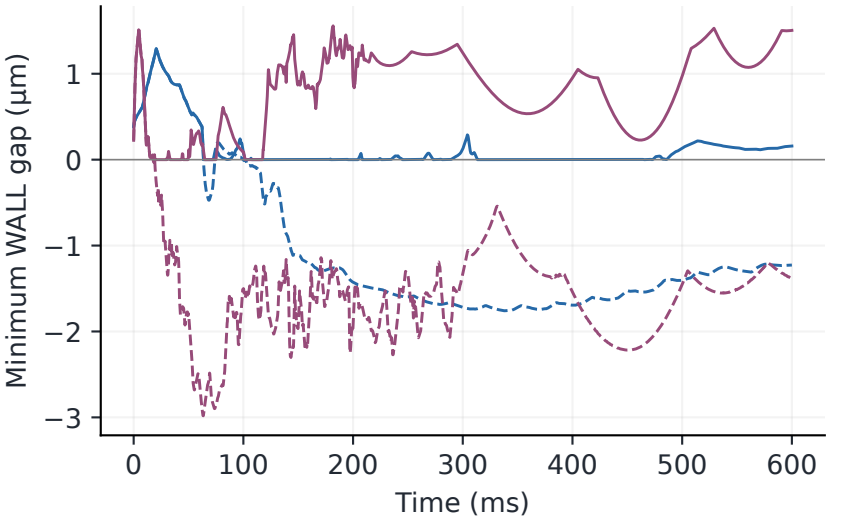

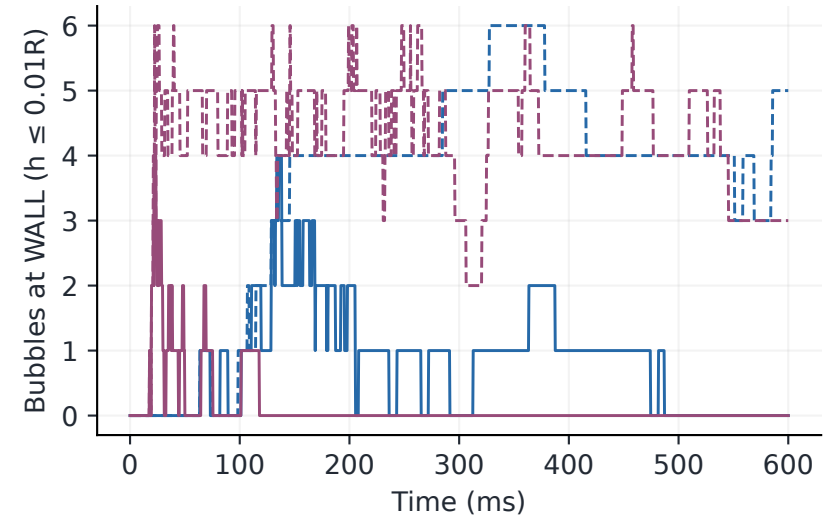

Junction | t = 600.0 ms; Nmax = 32

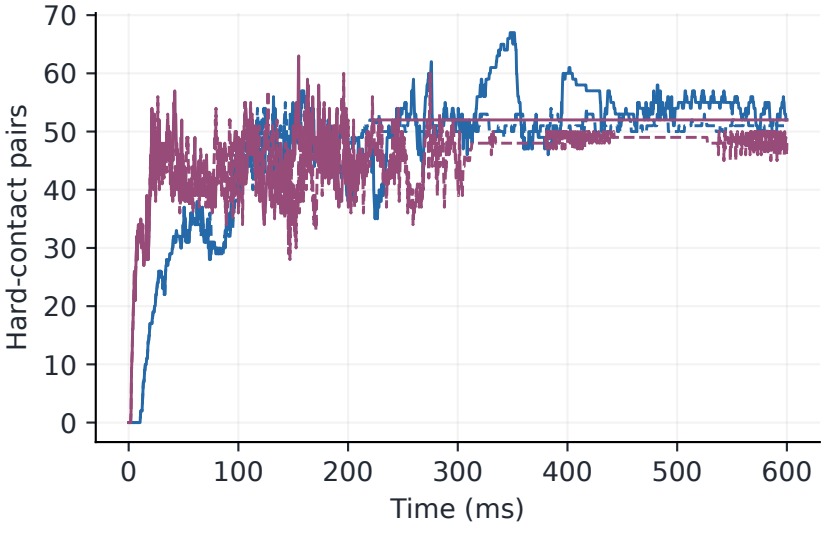

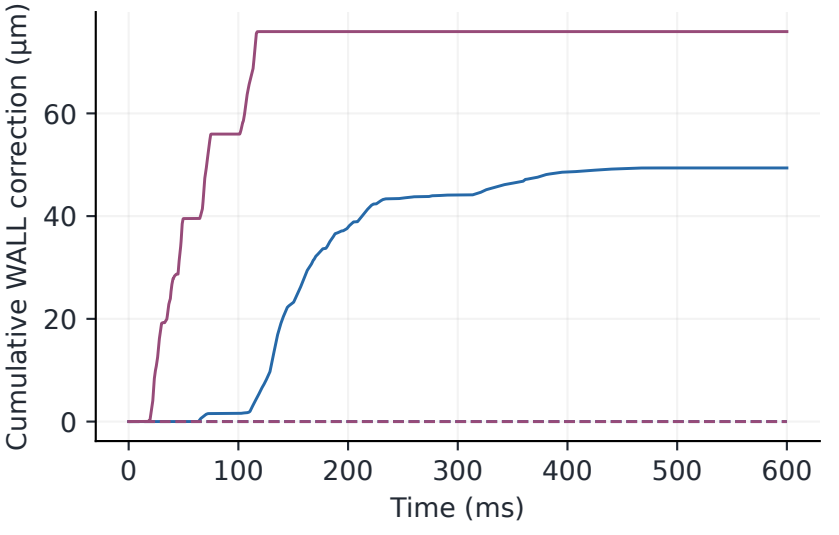

WALL OFF uses identical initial states with unconfined F3 motion. Negative wall gaps are comparator penetrations.
Contact counts use saved states; cumulative corrections sum all physical-step wall passes. GEOMETRIC_WALL_ONLY / EXPLORATORY
