F4-3 | PZT control from the same near-wall cluster

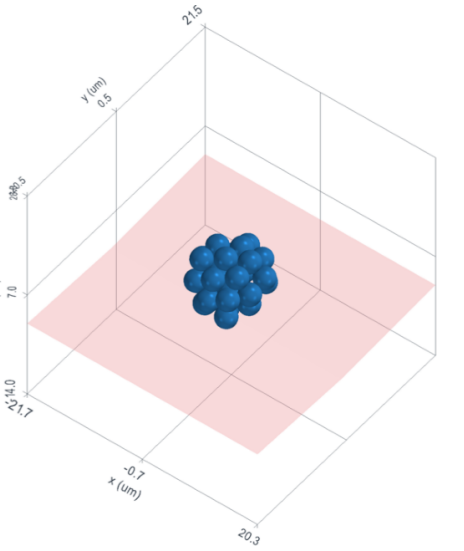

Same initial state | 600 ms

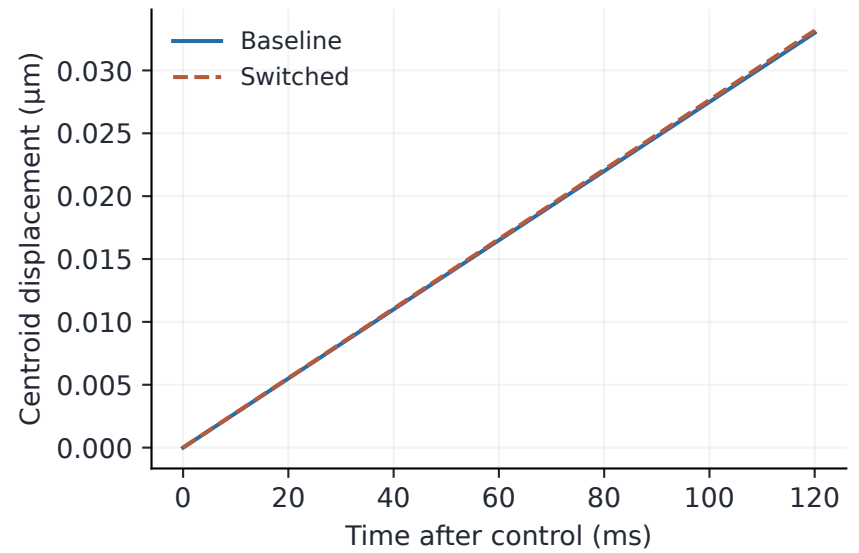

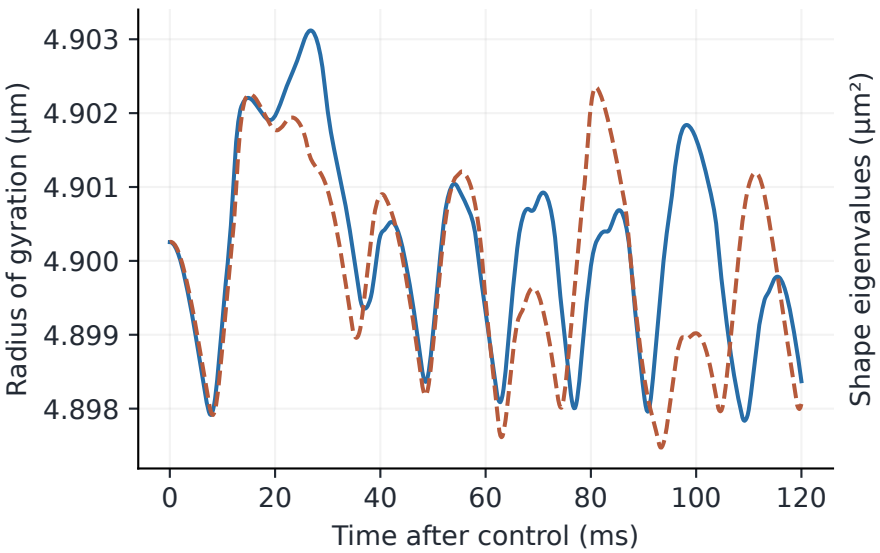

Unchanged PZT | 720 ms

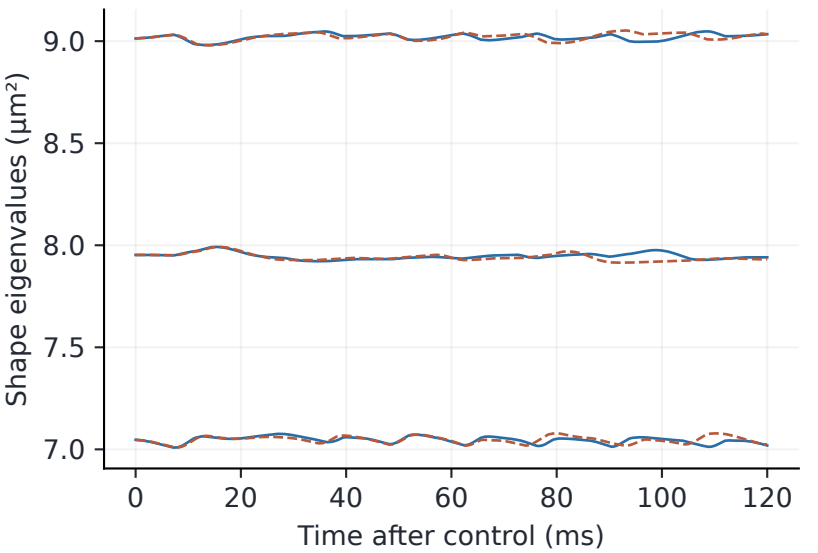

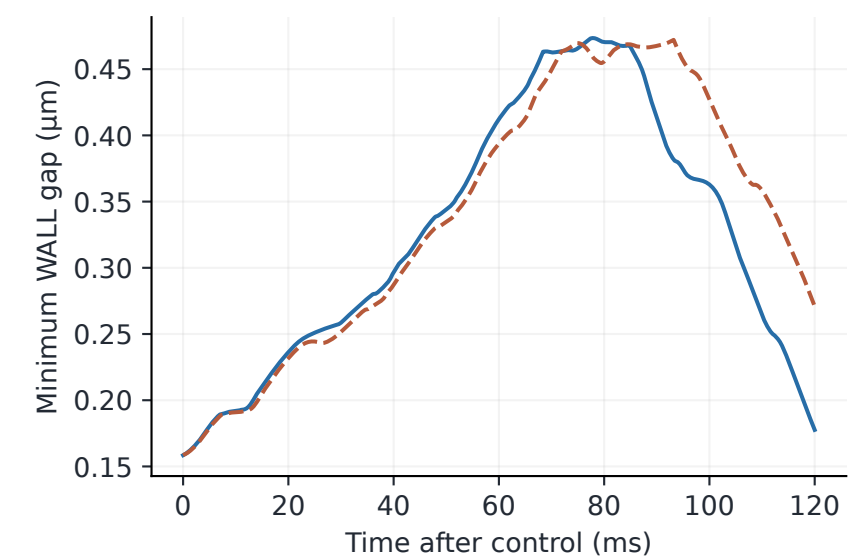

Y+ phase +30° | 720 ms

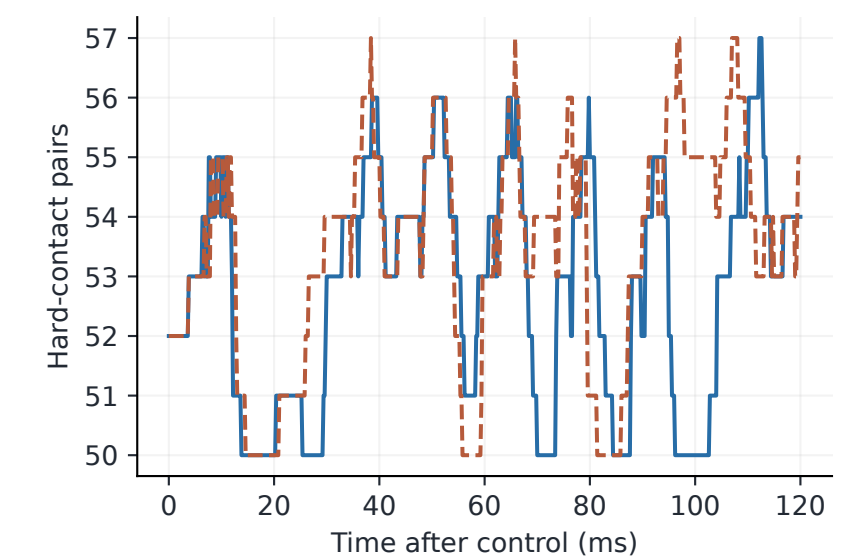

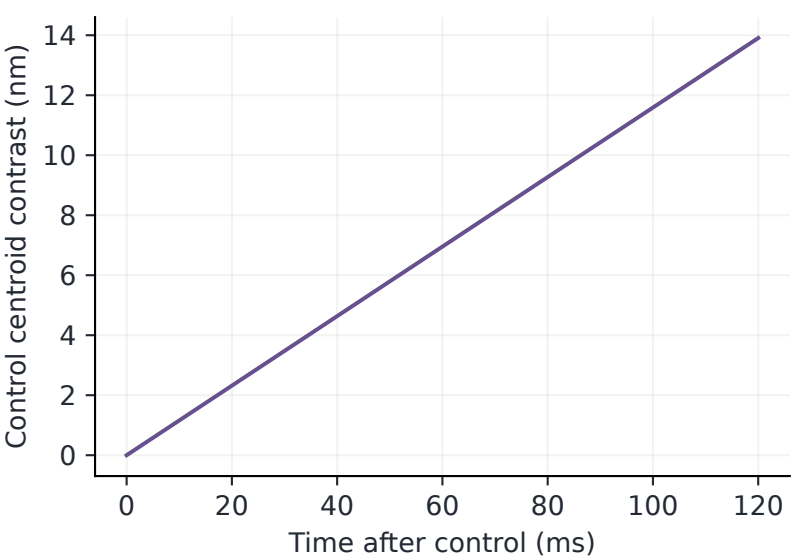

Weak computed response: endpoint centroid contrast 13.9 nm; relative Rg contrast 0.0063%.
No further WALL contact; WALL ON/OFF trajectories coincide. Robust shape control is not established. EXPLORATORY.
