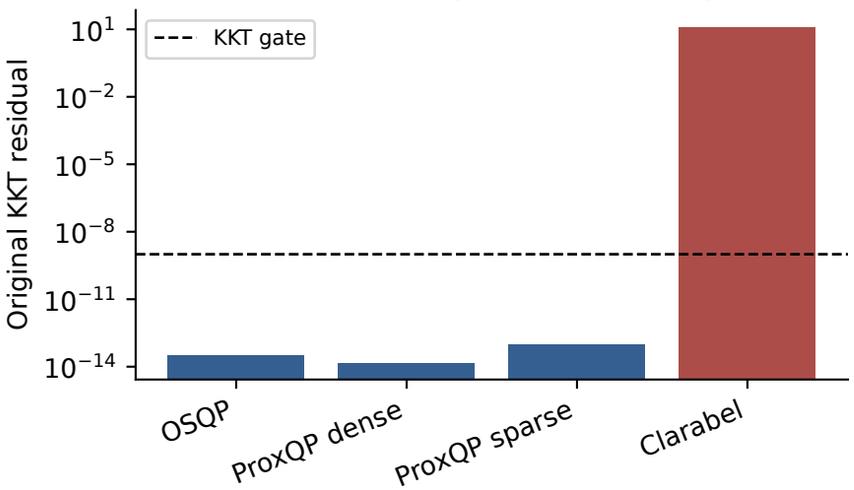
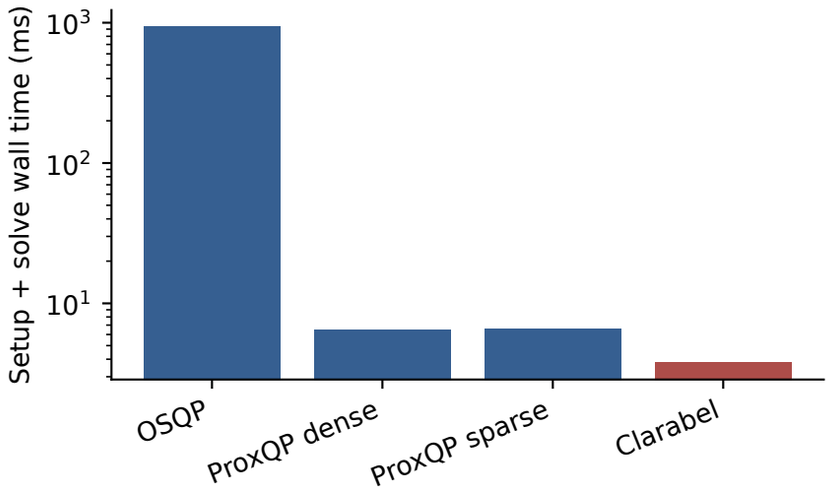
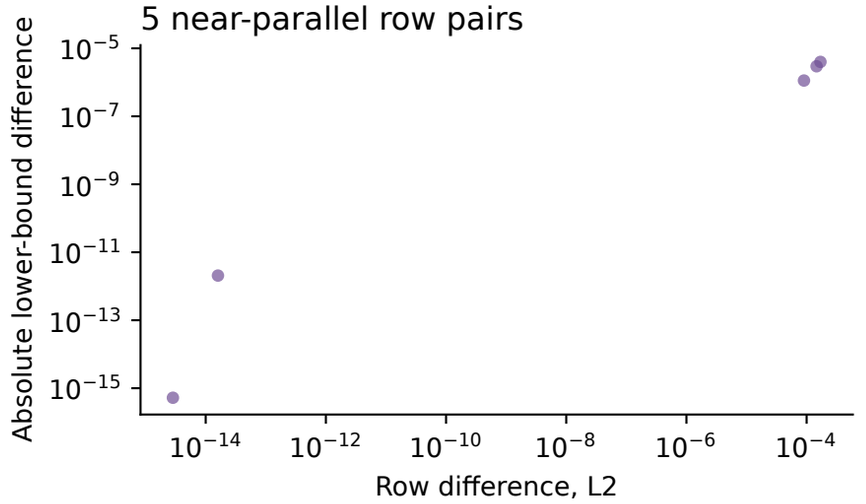
R3 | Original failed QPs: solver recovery and near-dependent inequalities

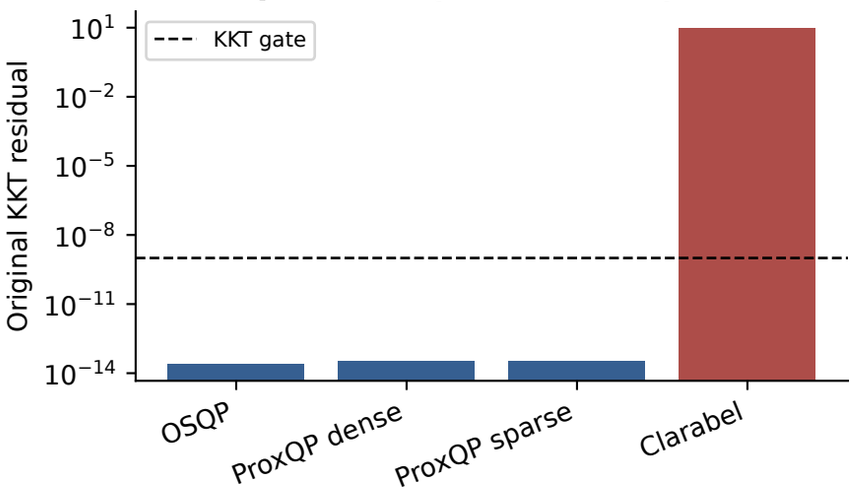
Earlier active set (114 variables)

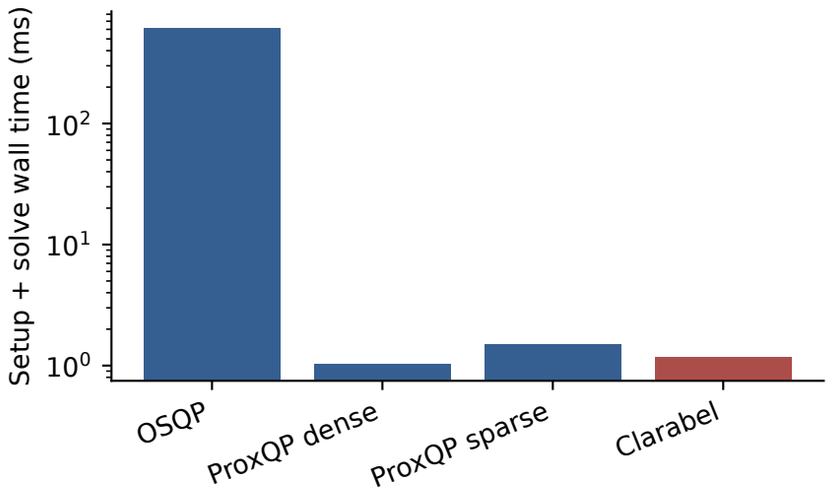


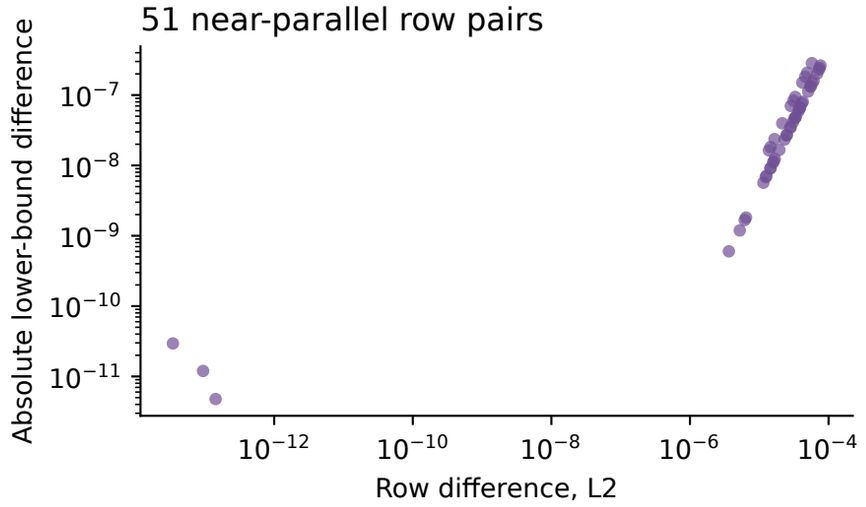




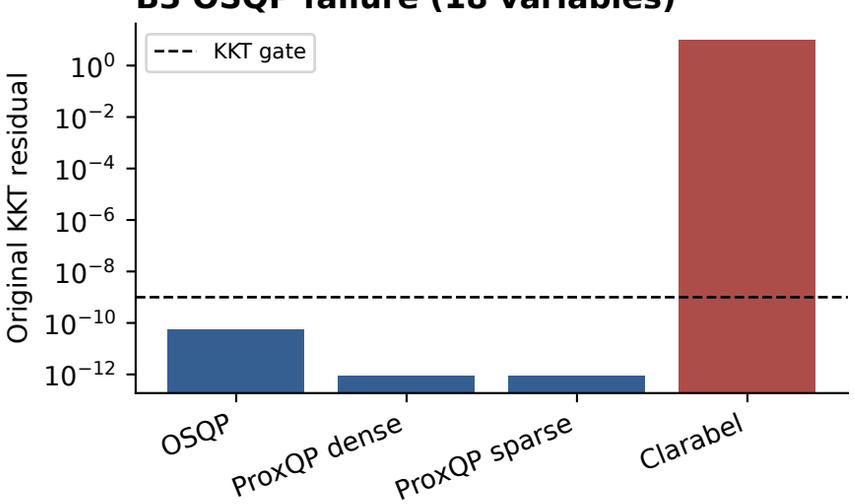
B2 OSQP failure (51 variables)

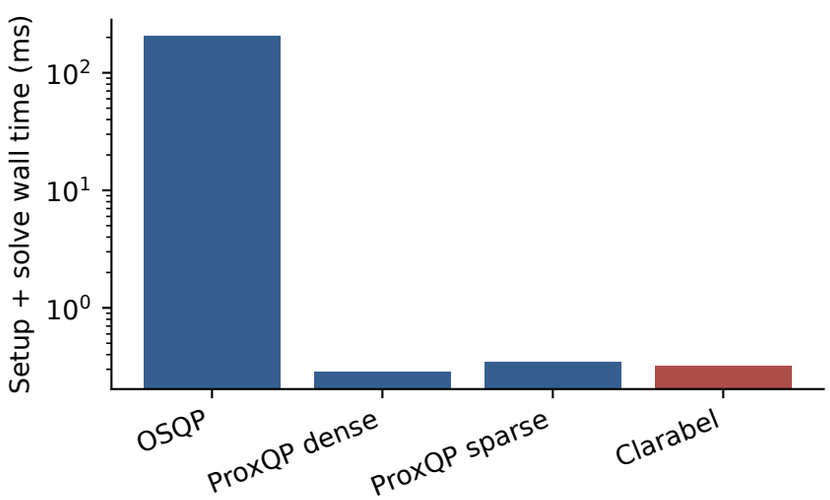


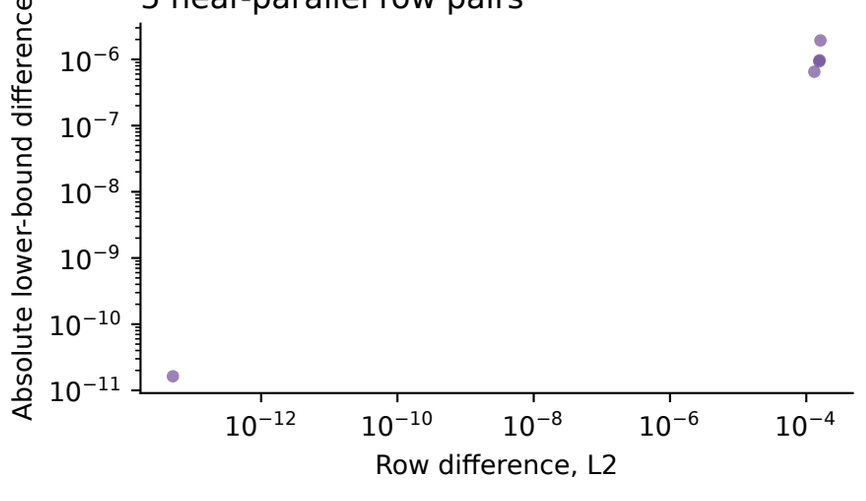




B3 OSQP failure (18 variables)







Original Stage5A base 7c39828d9350; native_v1 / reconstruction_v1. Internal tolerance 1e−12.
Original matrices retained. Red = independent certificate rejected. Parallel diagnostic timing; not trajectory speedup.
