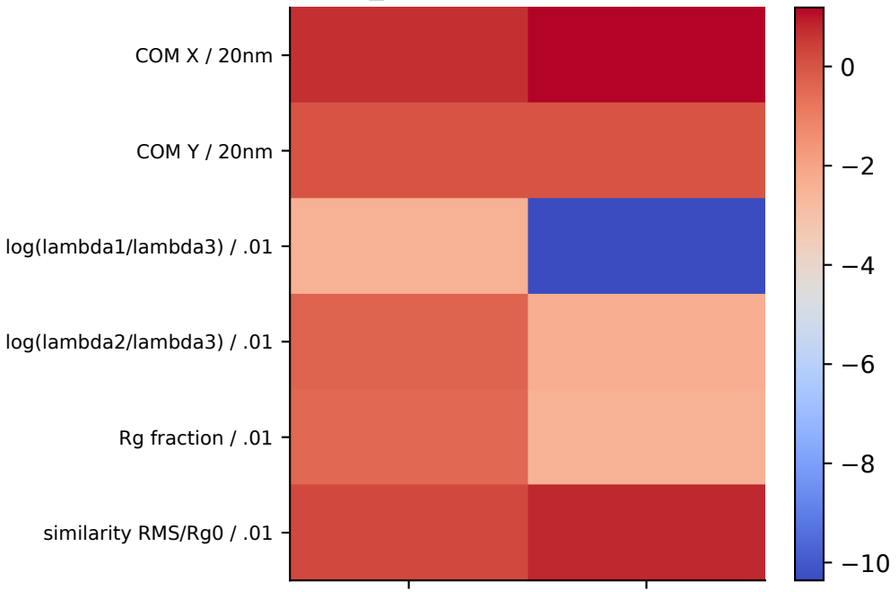
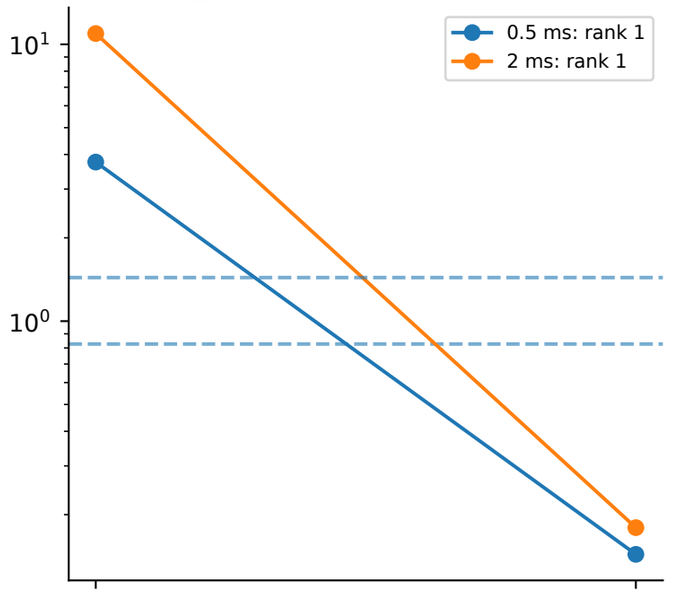
Local action sensitivity and identifiability

S2_r0 normalized response



Shape singular values; dashed: error bound



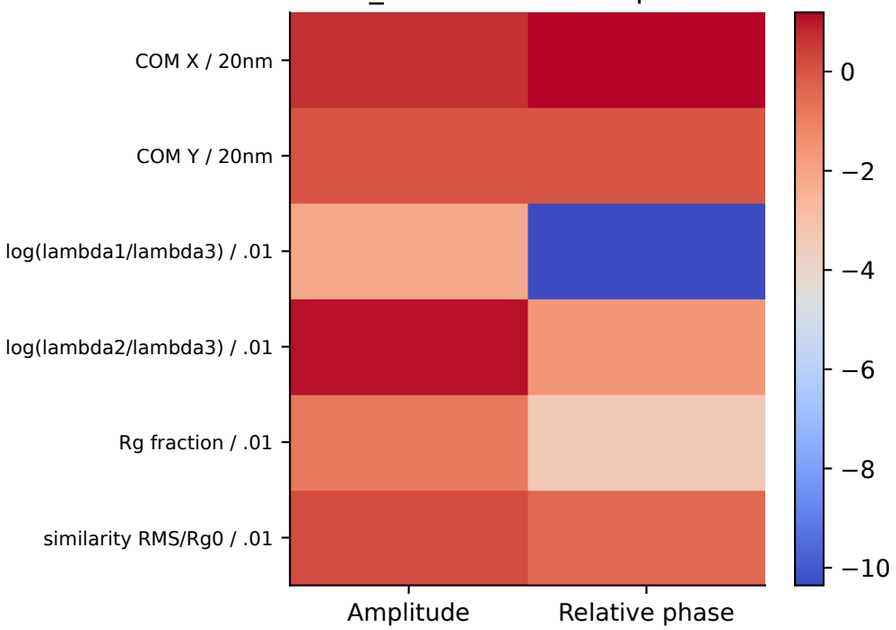
S2_r0: PASS

Two inputs only: common X-pair amplitude and relative phase.

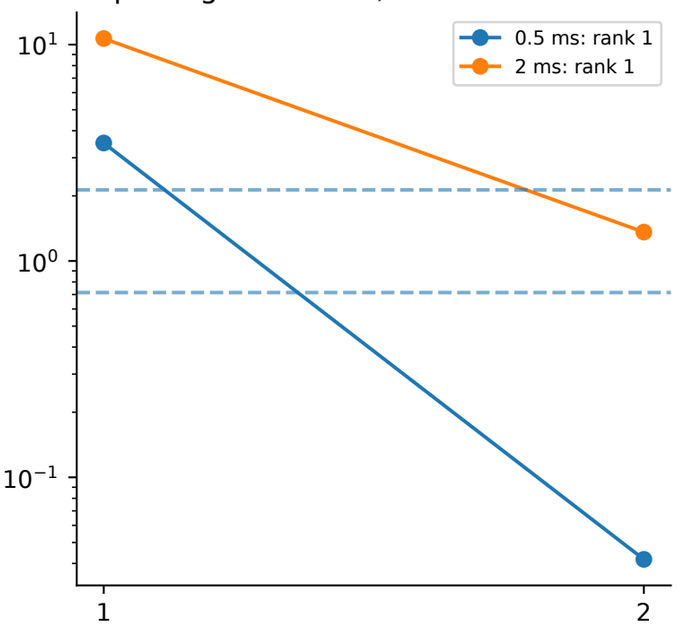
Shape rows exclude COM and uniform Rg scale.

Finite-difference discrepancy: 1.44
Threshold: 1.44
No global four-PZT controllability claim.

S4_r0 normalized response



Shape singular values; dashed: error bound



S4_r0: PASS

Two inputs only: common X-pair amplitude and relative phase.

Shape rows exclude COM and uniform Rg scale.

Finite-difference discrepancy: 2.13
Threshold: 2.13
No global four-PZT controllability claim.
