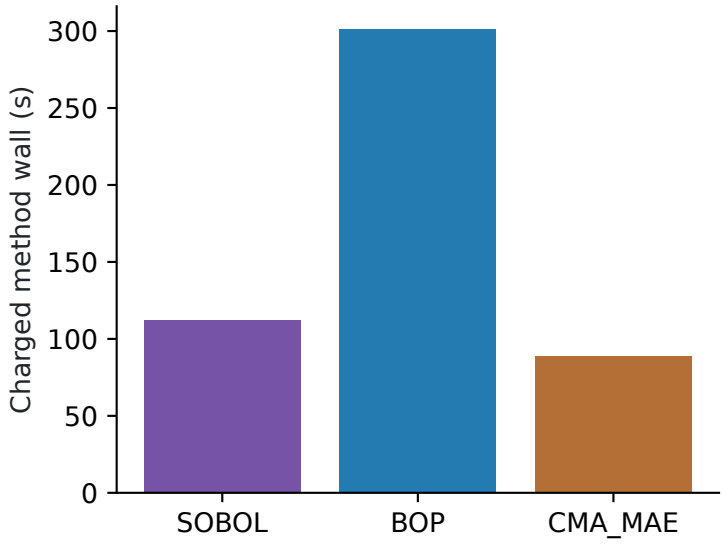
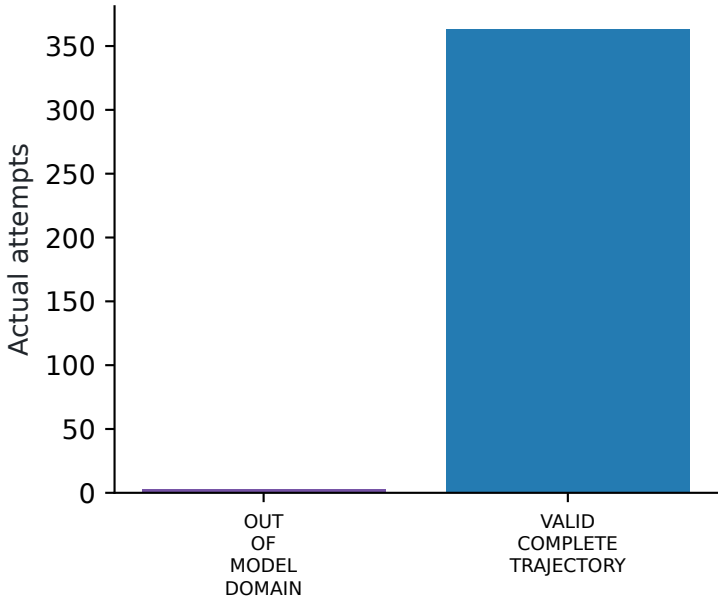
# Compute cost and scientific yield





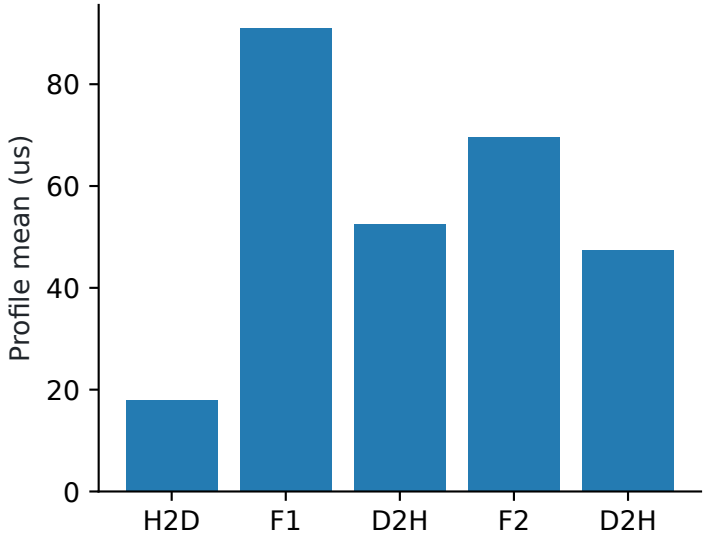
Completed trajectories: 363 / 366

Independent seeds per elite: 3

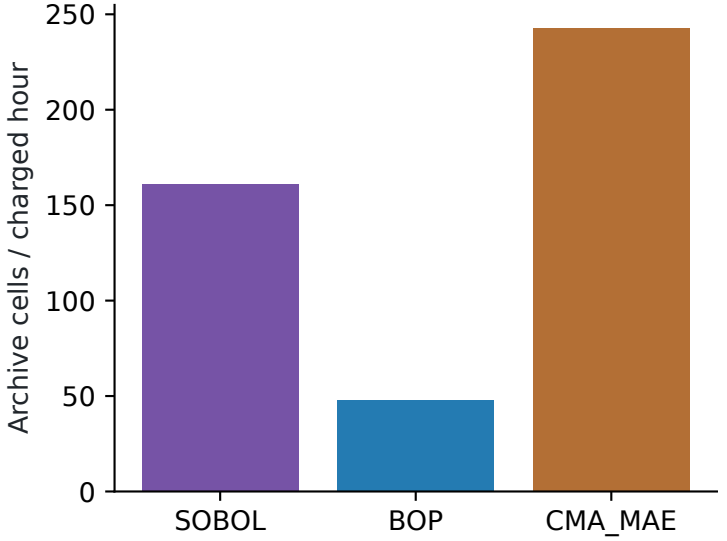
Signed response repeated: 3 / 4

Archive cells are not independent modes.
No experimental or training admission.

## N64 GPU transfer and kernels



## Coverage throughput; not physical modes



Confirmed response sign categories: 1

No resolved absolute principal extension.

Per-method independent-mode yield:
NOT_RUN (selected-candidate validation).

Strong outside-archive response:
three new-seed dt checks FAIL.
