F10M-R3 | Four-PZT PDMS apparatus

Confirmed dimensions

PDMS: 32.5 × 9 × 9 mm
Main channel ID: 1.6 mm
Four ceramic faces: 7 mm

Mechanical boundaries

Two top holes: ID 1.5 mm; open
Both X ends: always sealed
Side PDMS path: 3.7 mm

Provisional hole reference

End face to hole center: 5.4 mm
Hole axes: X = ±10.85 mm
Center-versus-edge reference unconfirmed

True dimensional ratios. Red surfaces bound the geometric cavity; top holes have no caps or assumed menisci.
Arrows point inward. PZT faces are numerical source locations; end-seal materials and acoustic coupling remain unknown.
