Morphology control | real particle geometry, translation removed

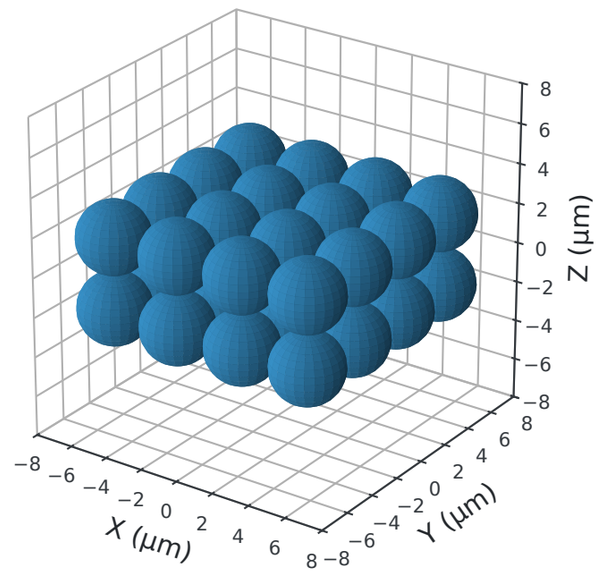

A Prescribed contact-network initial state

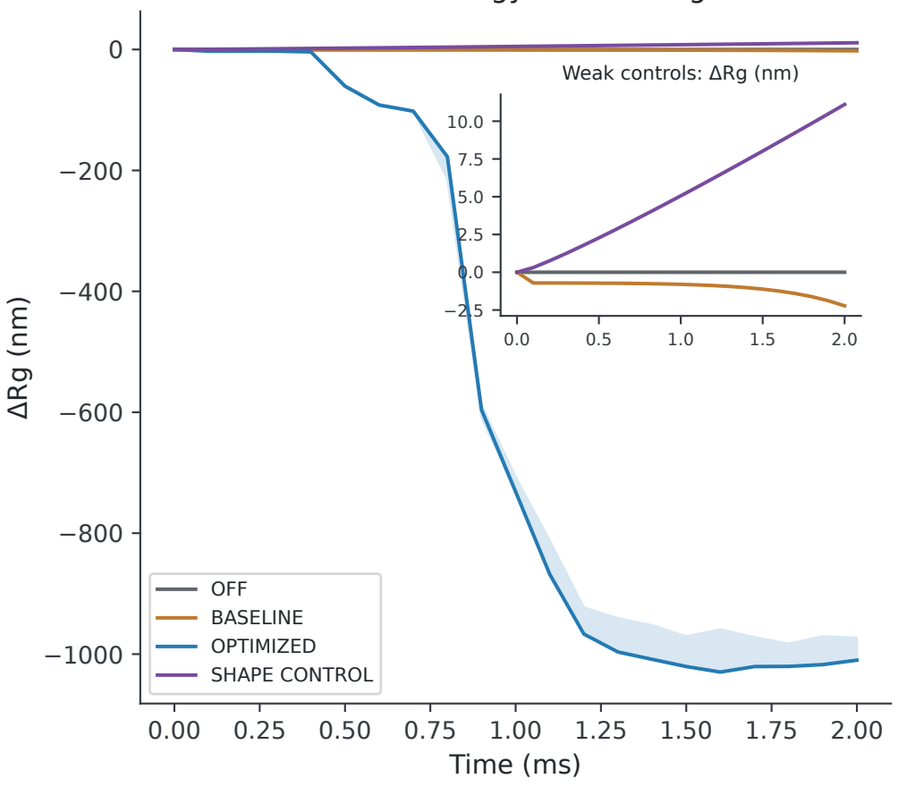

B Position control: unresolved layout

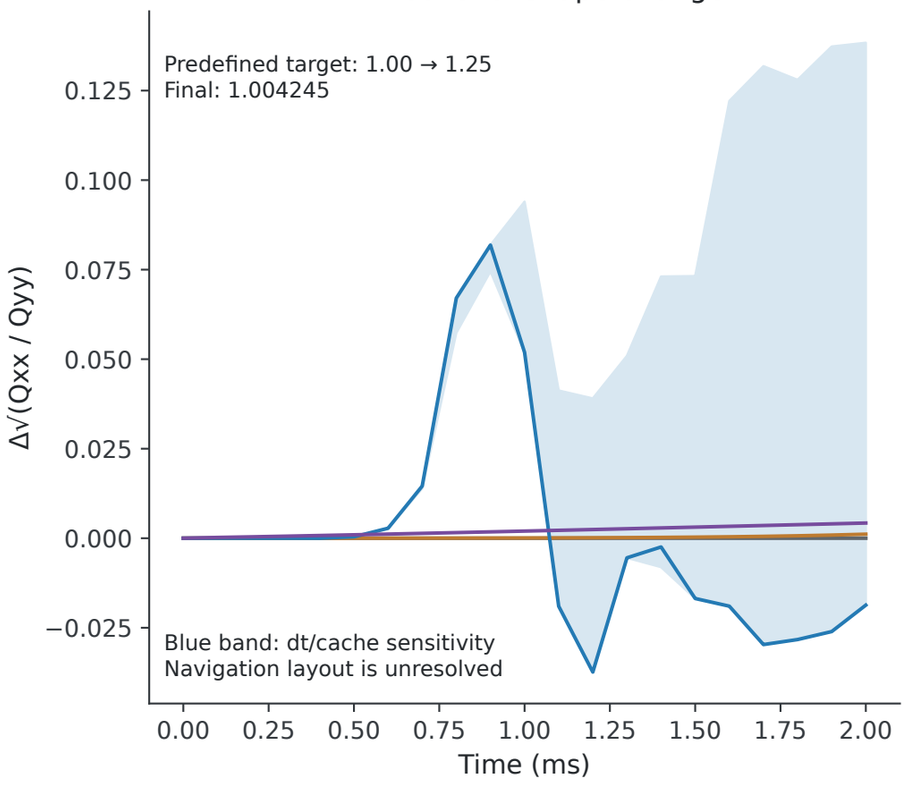

C Shape control: final state

D Radius-of-gyration change

E Directional shape change

F Centred fixed-ID measurements

Rg: 5.903887 → 5.914994 µm
Major/minor ratio: 2.236068 → 2.245910
Connected components: 1 → 1
Major axis identifiable: True

Q initial → final diagonal (µm²):
XX: 15.843584 → 15.976755
YY: 15.843584 → 15.841976
ZZ: 3.168717 → 3.168426

Shape target reached: FALSE
Connectivity is not physical fusion.
