Simulation control sequences for four PZT discs

a Actual four-disc layout; 7 mm diameter

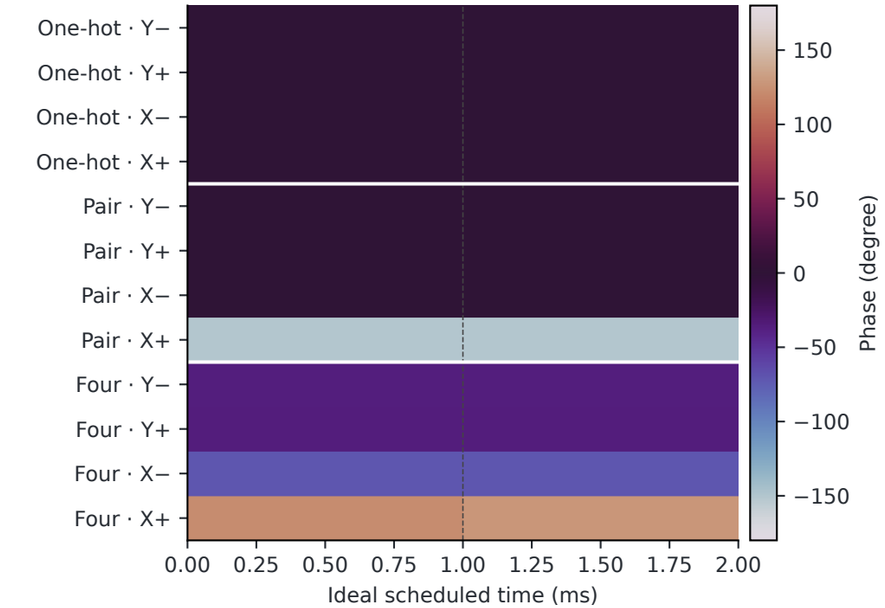

Water-filled, no flow; X ends sealed
PZT discs shown as surfaces
Planned A: X−/X+; B: Y−/Y+

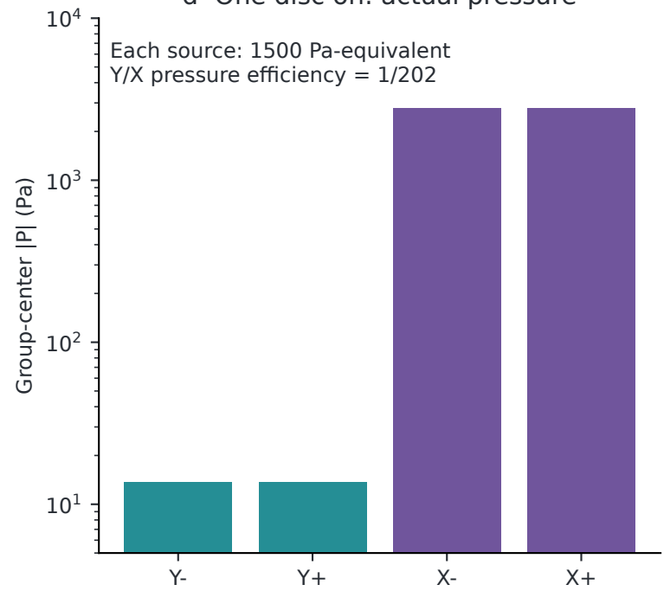

b Registered source amplitudes

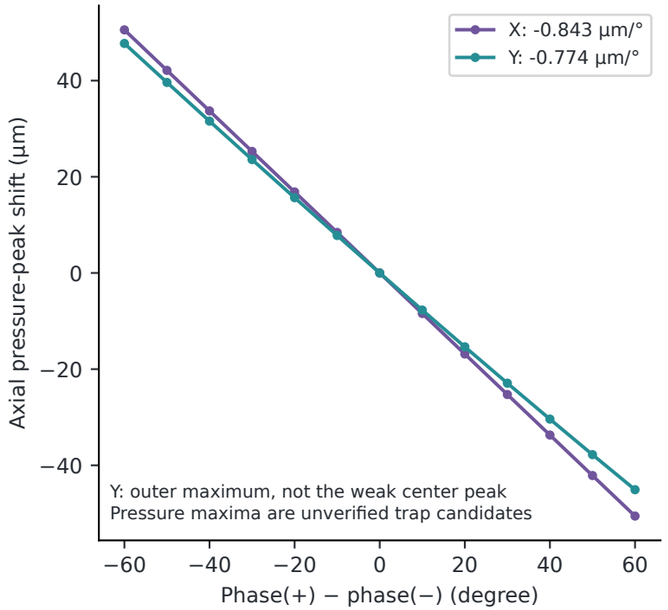

c Registered phase offsets

d One disc on: actual pressure

e Field-only continuous peak branches

IDEAL_SCHEDULED_SEGMENTS · Pa-equivalent is not Vpp · ELECTRICAL_TO_ACOUSTIC_UNCALIBRATED · No hardware execution
All Y results: HOMOGENEOUS_WATER_PROXY_SPECIFIC
EXPLORATORY · HOMOGENEOUS_WATER_CONTROL_PROXY · PHYSICS_UNCALIBRATED · training_ready=false
