F10Z | Preregistered initial configurations
32 bubbles, R = 1.78 µm; legal geometry; prescribed near-contact states are not acoustically formed

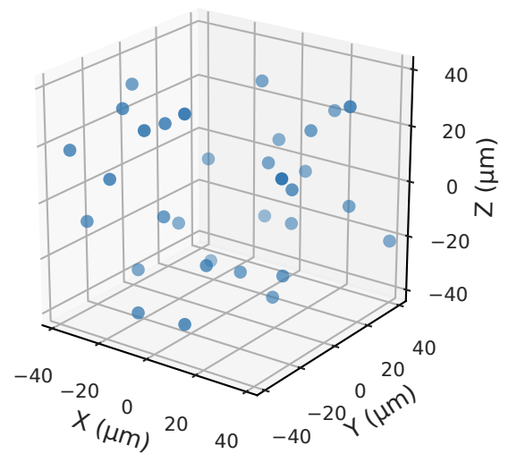

original | 3D centres

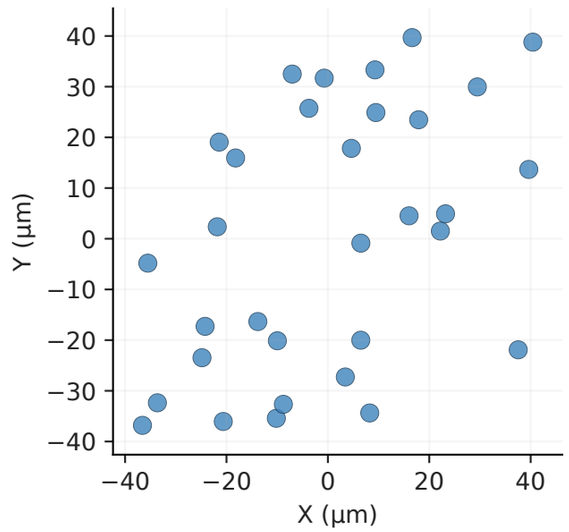

XY projection | min d = 3.56 µm
1 proximity components

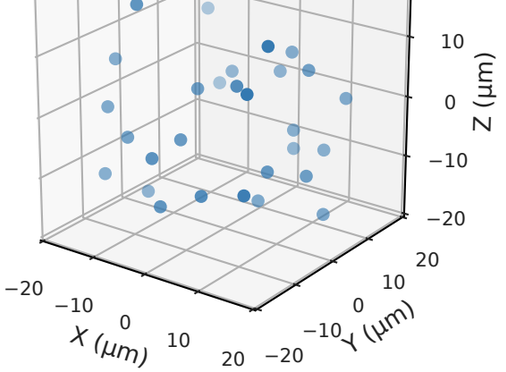

low train | 3D centres

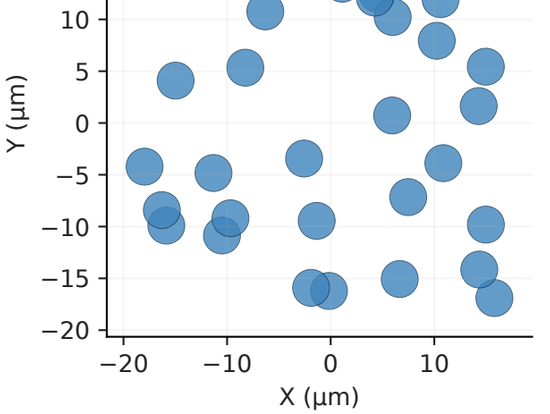

XY projection | min d = 12.56 µm
32 proximity components

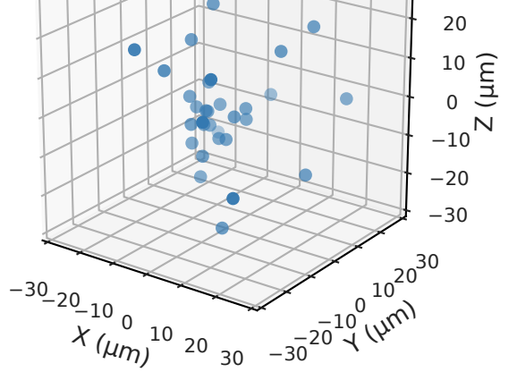

medium train | 3D centres

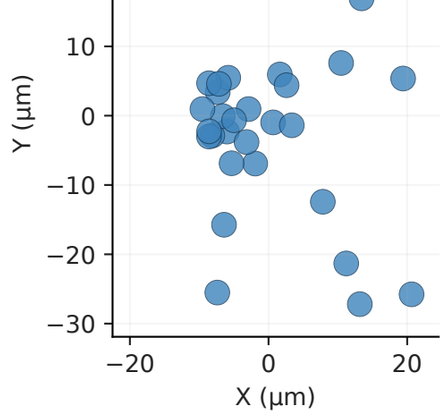

XY projection | min d = 5.04 µm
32 proximity components

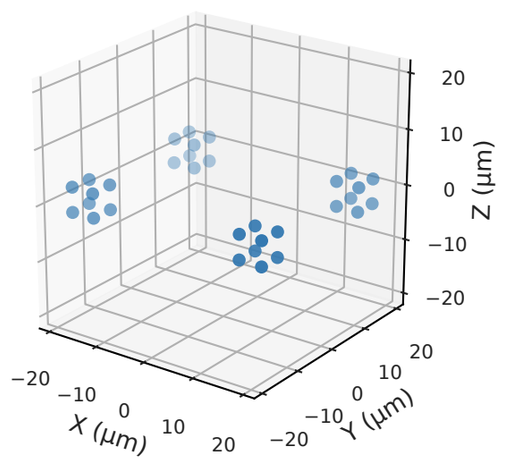

local dense | 3D centres

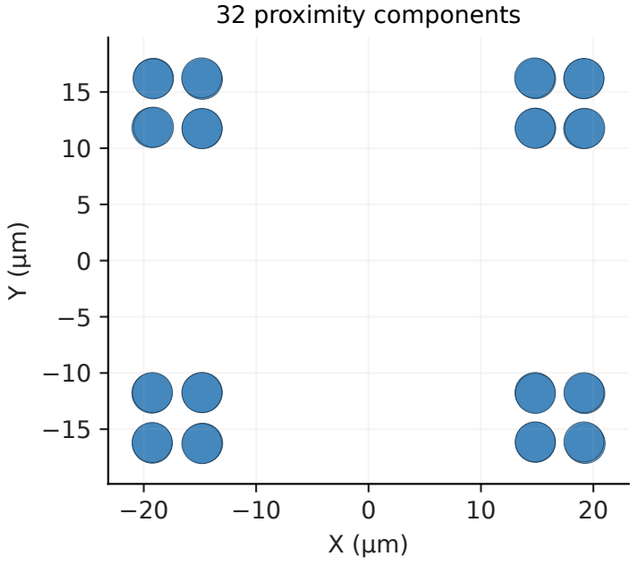

XY projection | min d = 3.86 µm
32 proximity components

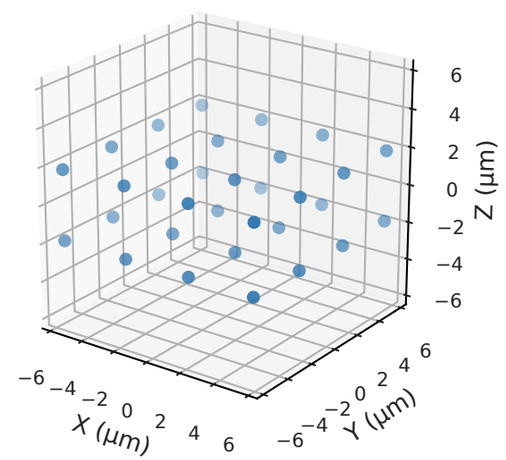

multi cluster | 3D centres

XY projection | min d = 4.27 µm
32 proximity components

near contact | 3D centres

XY projection | min d = 3.71 µm
20 proximity components
