a O / 1102 — Saved accepted input
Rg 4.906 µm; aspect 1.180; overlap 17.788 nm

b O / 1102 — Original PBD: rejected proposal
Rg 4.906 µm; aspect 1.180; overlap 17.831 nm

c O / 1102 — B2 / 2kc: static budget pass
Rg 4.902 µm; aspect 1.180; overlap 17.501 nm

d Preparation / 1104 — Saved accepted input
Rg 5.377 µm; aspect 1.364; overlap 17.762 nm

e Preparation / 1104 — Original PBD: rejected proposal
Rg 5.369 µm; aspect 1.366; overlap 17.831 nm

f Preparation / 1104 — B2 / 2kc: static budget pass
Rg 5.366 µm; aspect 1.366; overlap 17.323 nm

g Common accepted prefix: internal positions

h Rg and aspect: same accepted prefix

True radius = 1.78 µm; fixed IDs and viridis colors (0 = purple, 31 = yellow). Equal XYZ scales; lines link centers at d ≤ 2.1R.
Upper panels: same saved initial state and force, one-step proposals; these are not a time sequence. Lower panels: actual saved trajectories.
Old PBD has no accepted reference beyond 4.85 ms (O) / 2.20 ms (preparation). Different-model agreement is not physical truth or new-model time convergence.
