Where the geometric wall correction enters the trajectory

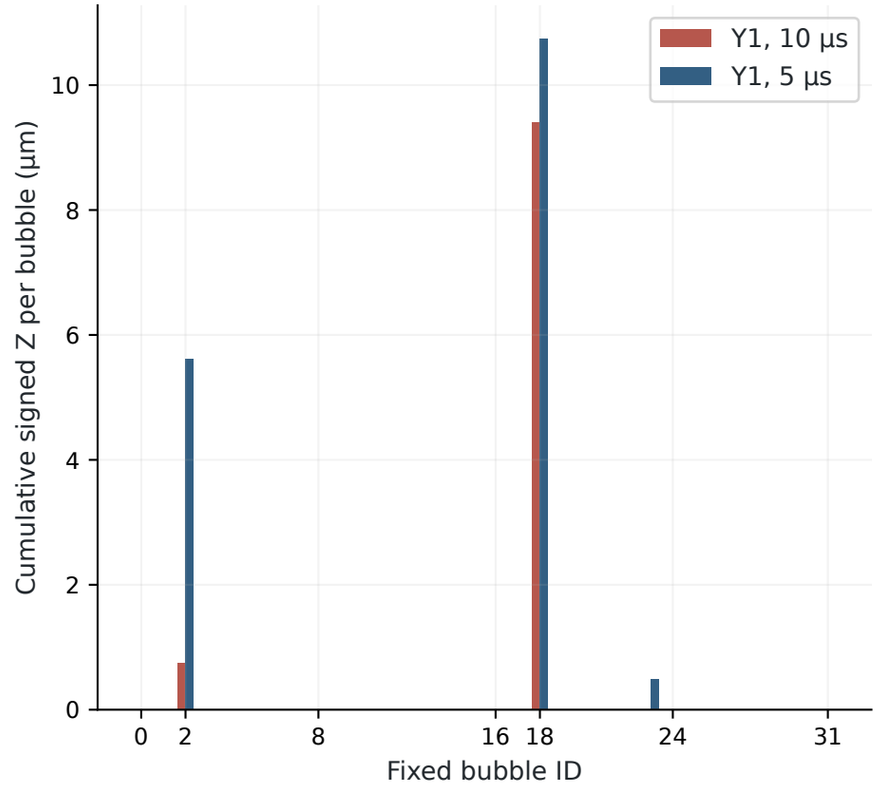

(a) Original facets, physical bubble radius

ID 18; t = 45.05 ms
R = 1.78 µm; correction arrow ×2000
Normal arrow: 3 µm display length

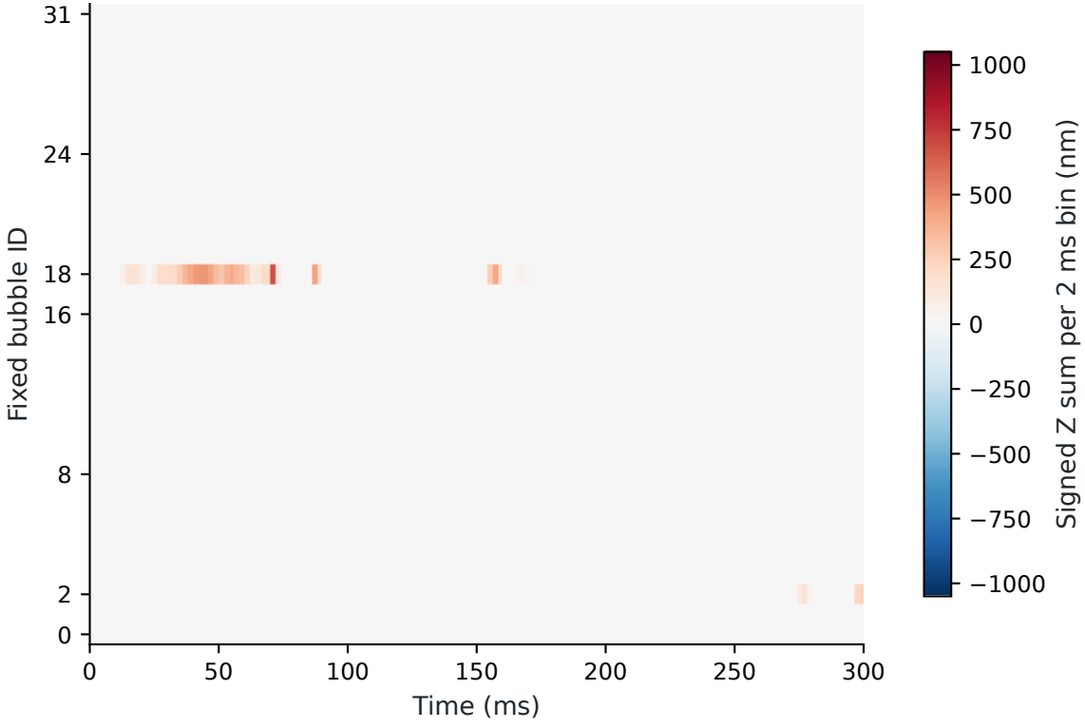

Facets 25305 / 271 clipped to viewing box;
origin = actual pre-projection bubble center

(b) Individual signed wall contributions

(c) Y1, 10 µs: wall events

(d) Y1, 5 µs: wall events
