Failure audit | lowest-score example per preregistered difficult condition
Raw estimates are diagnostics; rejected values are not valid observations

fixed background

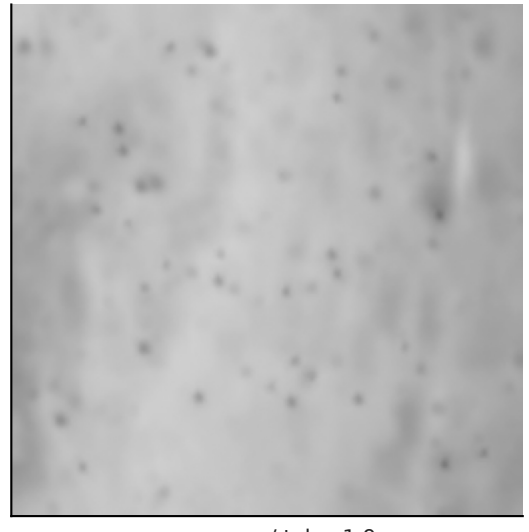

max error / tol = 3.7
score=4.6 (lower = more confident)

defocus

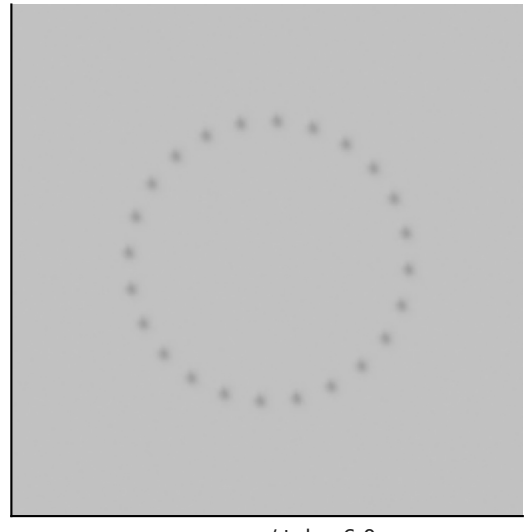

max error / tol = 6.6
score=4.6 (lower = more confident)

dropout

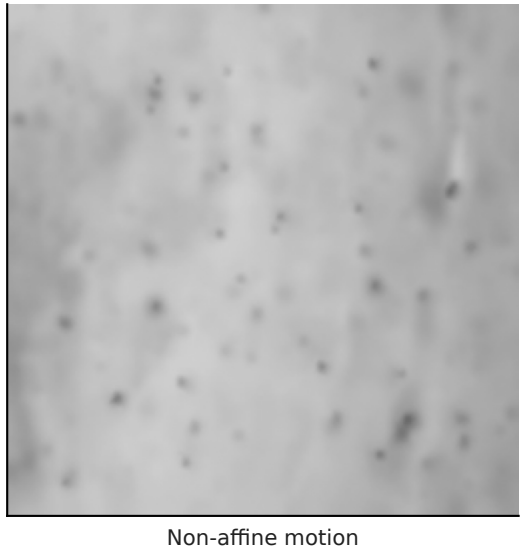

max error / tol = 1.9
score=4.6 (lower = more confident)

symmetric

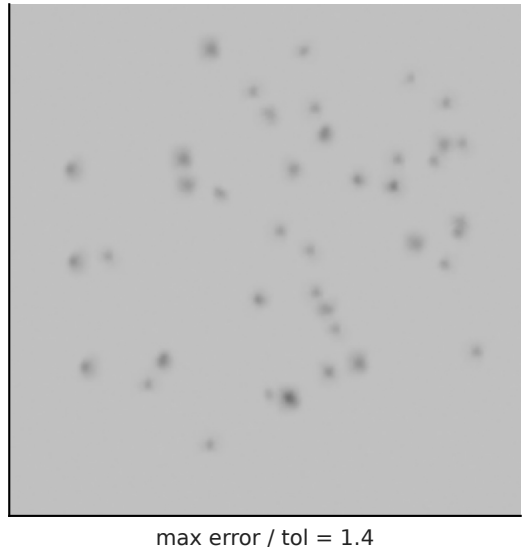

max error / tol = 6.0
score=4.6 (lower = more confident)

non affine

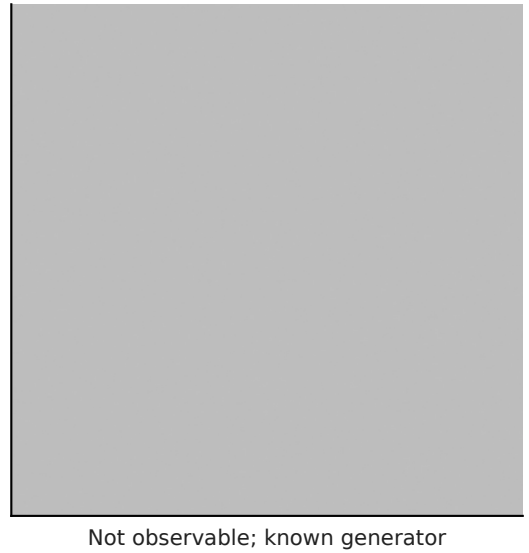

Non-affine motion
score=4.6 (lower = more confident)

start

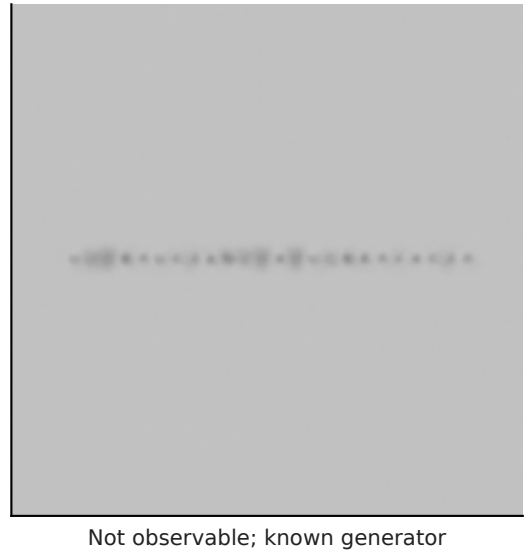

max error / tol = 1.4
score=4.6 (lower = more confident)

low texture

Not observable; known generator
score=4.6 (lower = more confident)

collinear

Not observable; known generator
score=4.6 (lower = more confident)
