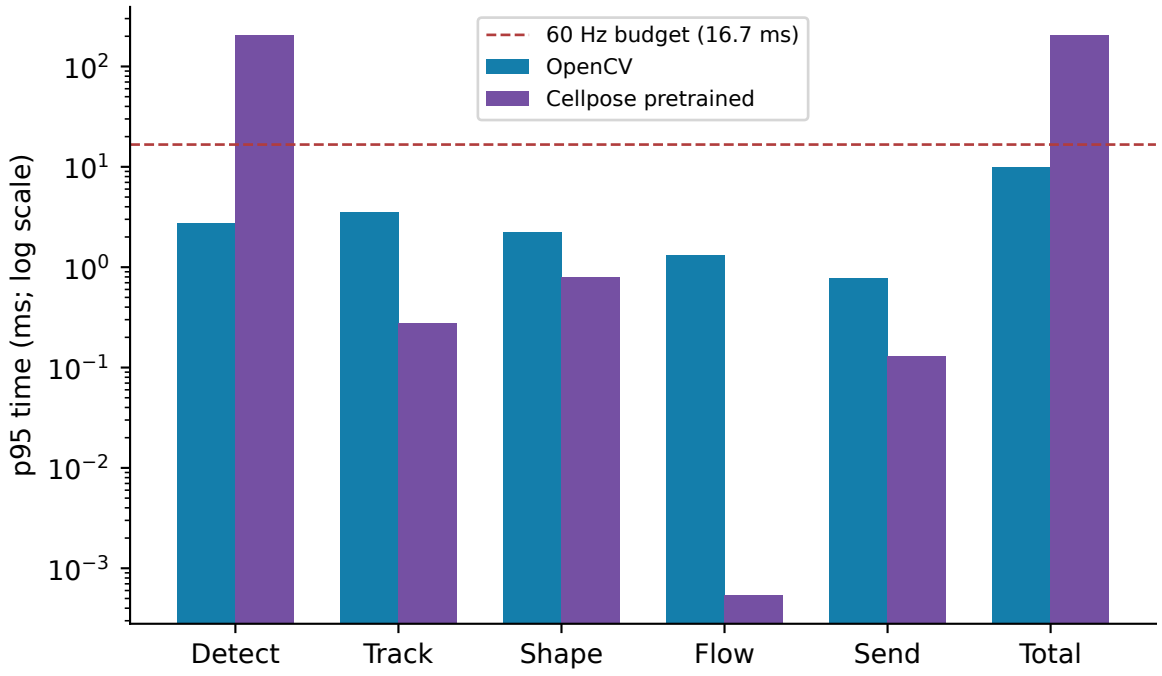
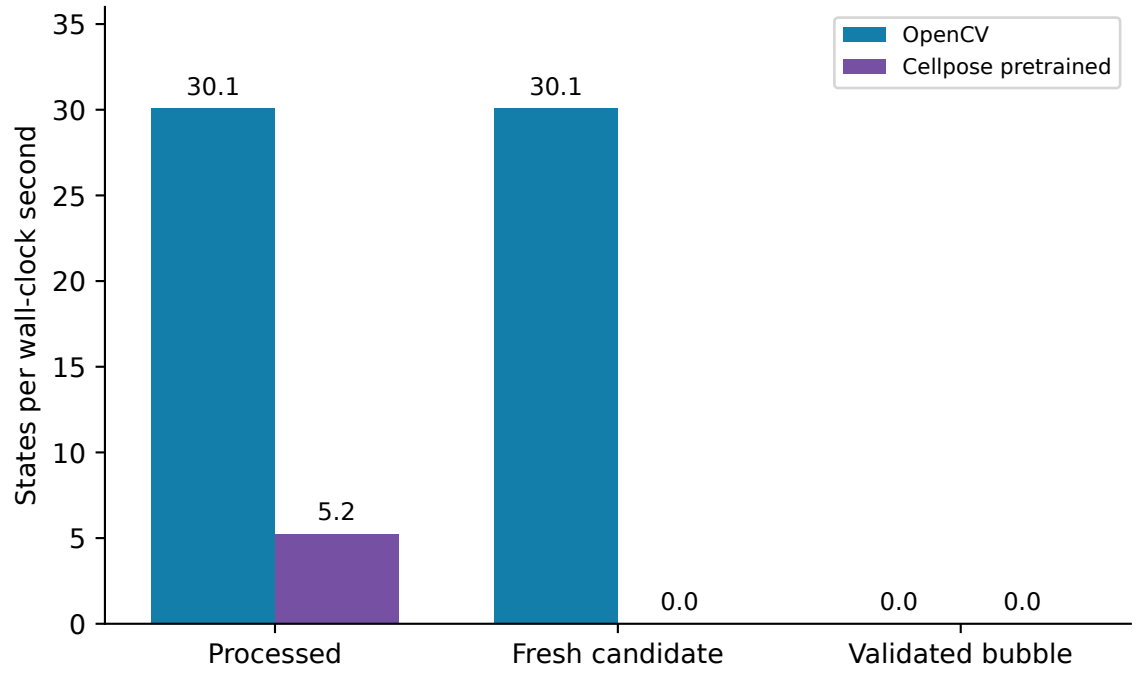
Measured offline software performance and admission limits
Latest-slot replay includes detection, tracking, morphology and mock-only messaging

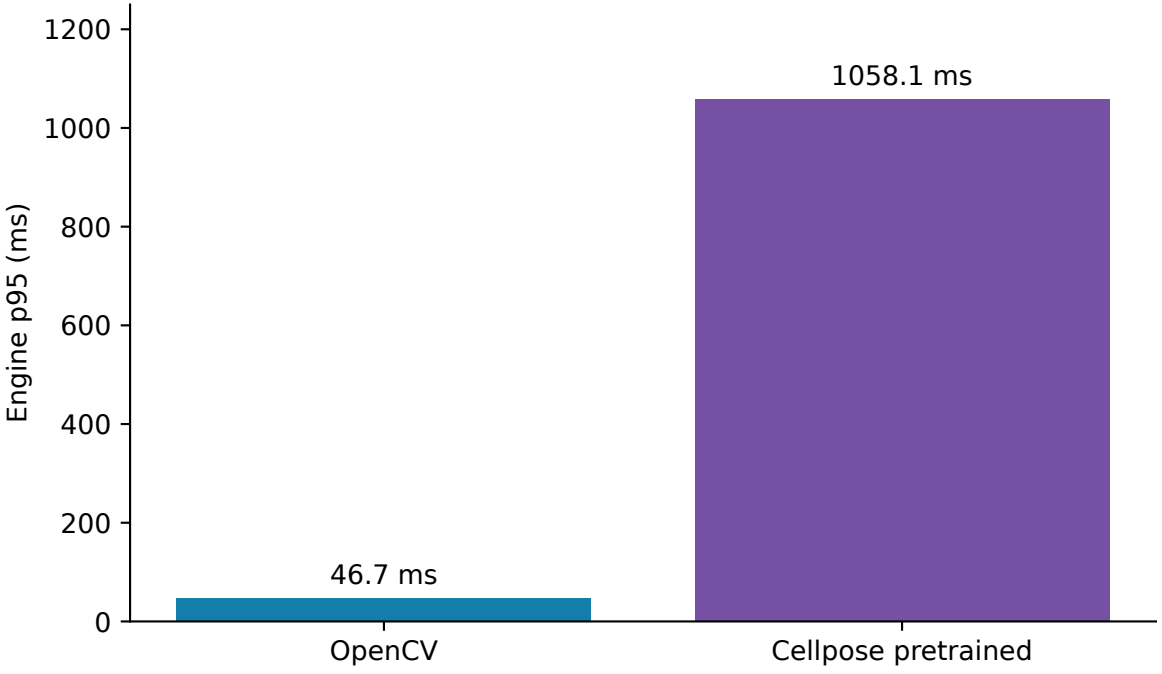
(a) Paced replay | 180 x 350 px, native pixels



(b) Recorded input ~30 fps; this is not live 60 Hz



(c) Larger 550 x 560 px ROI | 60 ordered frames



Current camera run: NO LIVE FRAMES

Camera disconnected (user confirmed).

LIVE_CAMERA_PASS = false
Live update rate / latency: NOT_MEASURED
End-to-end exposure latency: NOT_MEASURED

Group shape: null | control permission: false
No LED test; no AFG or PZT command.

GPU timings include the existing annotation workload.
