F10M | No-flow baseline in the confirmed channel

a Initial state

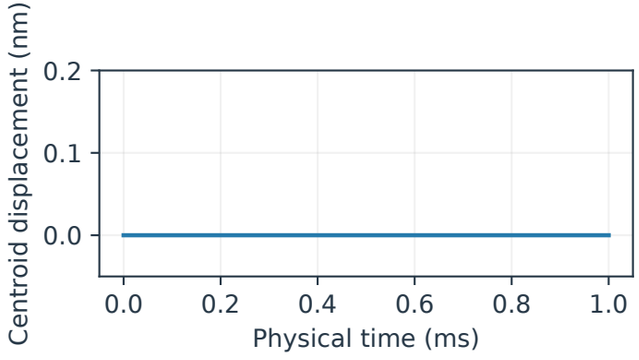

b OFF: 1.000 ms

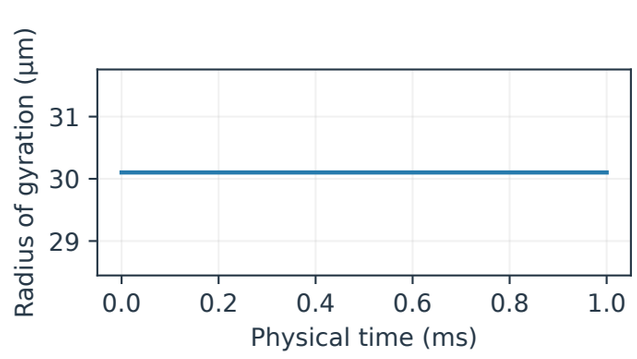

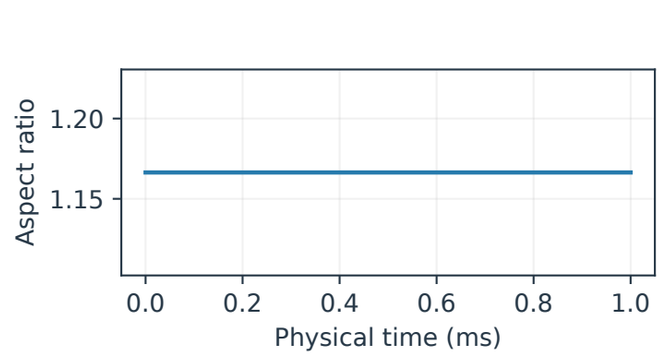

32 fixed particle IDs
Radius: 1.78 μm (DEMO)

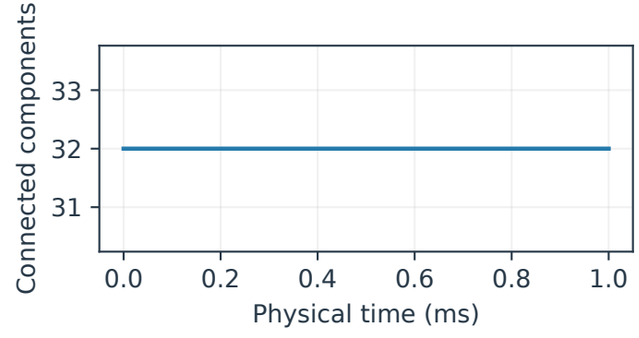

Zero background flow
X+ closed; top port open
Maximum displacement: 0

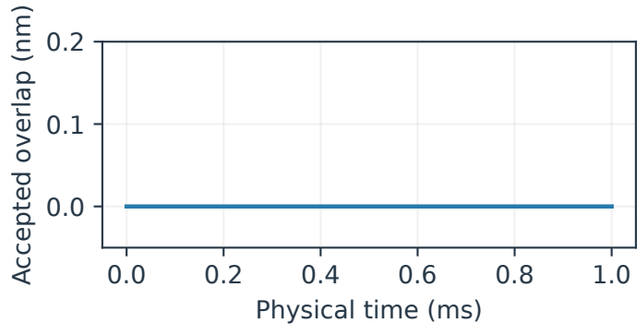

Three-PZT ON: NOT_RUN
Apparatus fields unavailable
Response frequency unmatched

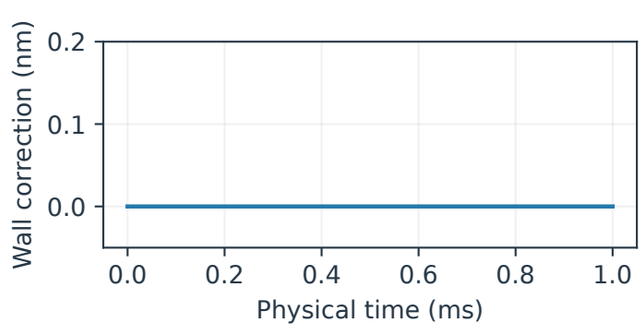

Actual 1 ms GPU trajectory, dt = 1 μs. True sphere radii and equal coordinate scales; fixed IDs 0, 7 and 19 labeled.
OFF positions remain bitwise unchanged. Original contact budgets retained. Main-bore check only: junction dynamics not admitted. ON: NOT_RUN.
