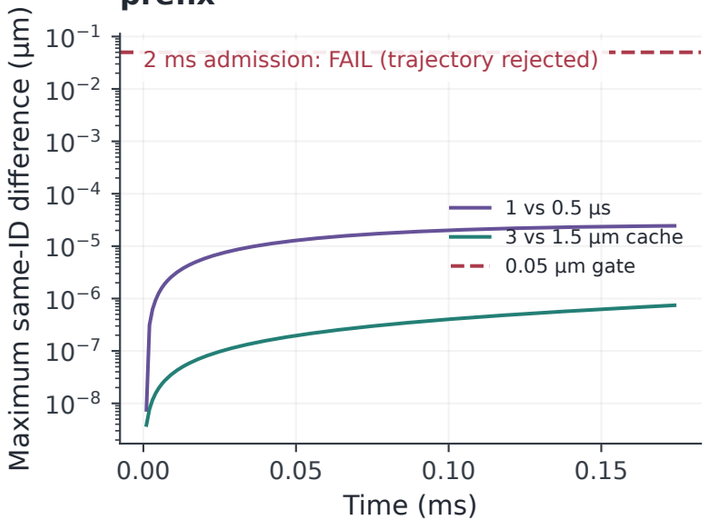
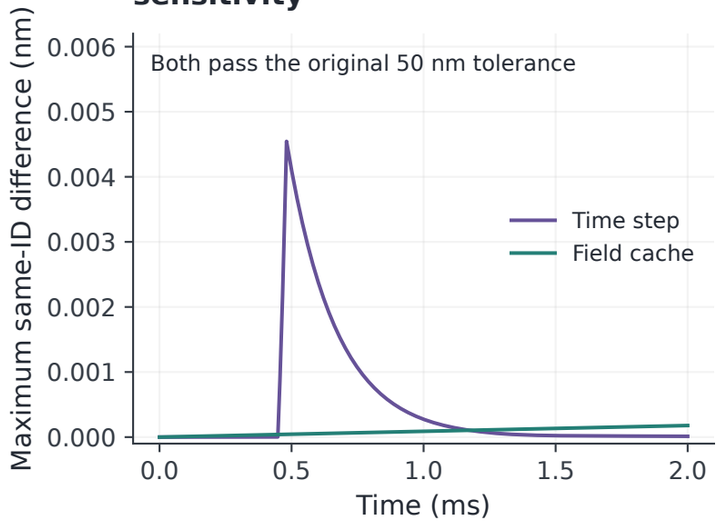
F10O | Fixed-ID convergence and model-dependent morphology

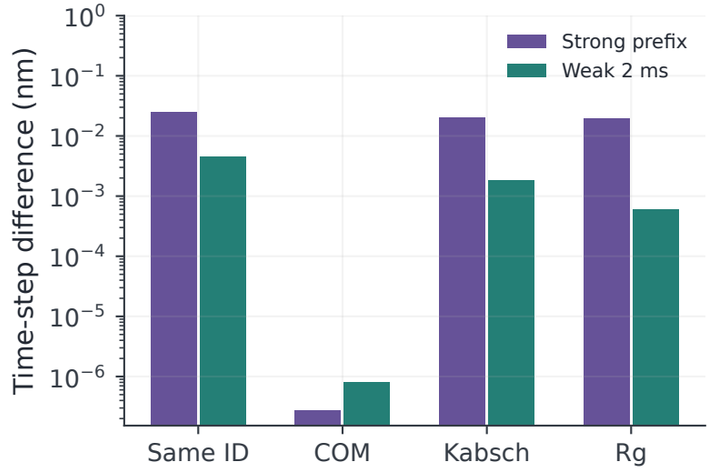
a Same-ID differences: strong valid prefix



b Weak control: complete 2 ms sensitivity

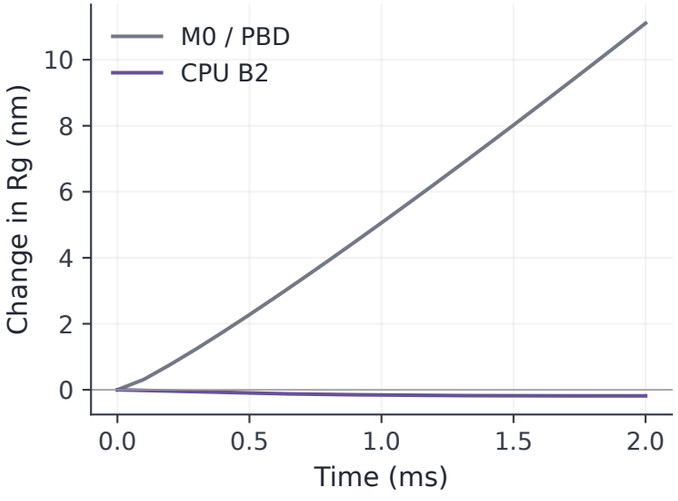


c COM and internal-shape sensitivity

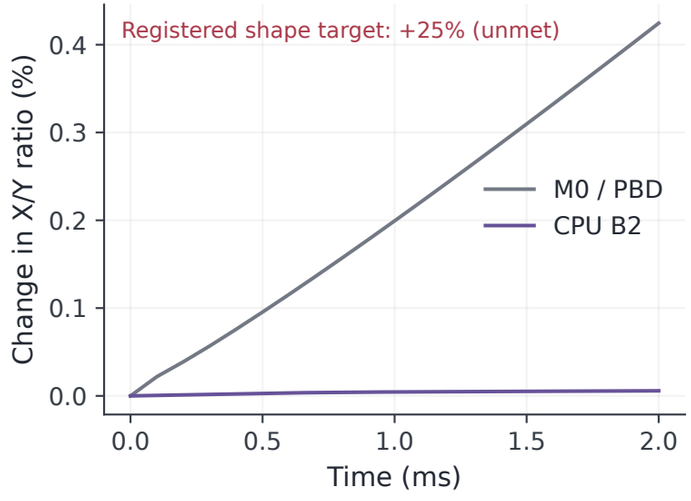


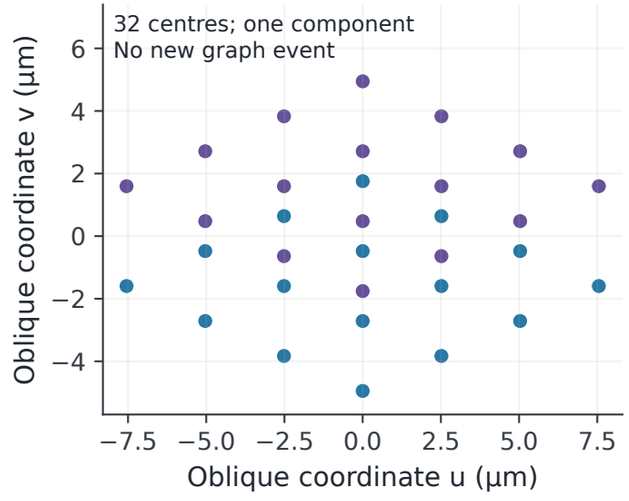
Tensor difference (µm²):
strong 0.000152; weak 6.67e-06

d Weak control: Rg changes sign across models



e Weak control: small X/Y shape response





f Fixed-ID weak B2 geometry, 2 ms
