

A-Network v1 | Provenance recovered; hydraulic source unresolved

Full original SWC: 9,828 nodes / 43 components

Blue: analysis component 42; orange: saved ROI

Exact ROI: 3 edge cuts + node 4484 (O3)

Dashed lines: artificial FEM extensions

- Analysis A (7,419 nodes)
- Saved connected ROI
- ★ Structural root; source unverified
- Other original components
- Graph endpoints (roles unknown)
- Current FEM cap

Coordinates are physical um after raw voxel scaling (1, 1, 2). No blood-flow direction is inferred from the drawing.
